Hi Susanna.

The Library cannot be trying very hard to reduce it's energy consumption. We live across the street and my bedroom and living room windows face the Library. I can see into both the 2nd and 3rd floors of the Library from my bedroom and living room windows. The lights to both floors were left on all last night. We moved to this location just over 4.5 years ago and I never said anything until just recently when I heard in the news that the Library board was asking for more money.

Regards.
