Dear Susanna:

Re: Possible Implementation of internet content filtering on the London Public library's access to internet service.

Please accept this as my letter of support for the London Public Library in regards to the possible implementation of internet content filtering on the library's public access internet service.

The Middlesex-London Health Unit would like to ensure that the public has access to sexual health information they need from both our public web site and from other sites that provide credible sexual health information. Please consider allowing our site to be accessible to the public if an internet content filter were to be placed on London Public Library computers. As a valued community partner in service provision for the public we would like to ensure the public have access to the sexual health information they need.

Sincerely,

Shaya Dhinsa RN, BScN, Med  
Manager of Sexual Health  
Middlesex-London Health Unit  
50 King Street
